Unique Entity ID (UEI): CVUXMWZL1AF7

Dear VA Rehabilitation & Prosthetics Services,

A clinician at your VA medical facility has recommended Constant Therapy for their patient. Please use this letter to validate procuring our program. Please allow us to help smooth the purchasing and vendorization process.

Constant Therapy is an evidence-based, digital speech, language, and cognitive therapy program created by a team of neuroscientists at Boston University in 2013. To date, thousands of people have successfully used Constant Therapy to recover from stroke, Traumatic brain injury, Aphasia, Parkinson's and other neurological injuries and conditions.

We have **a non-renewing program specifically designed for veterans receiving care within the VA. It is not a subscription.** You can read more about it at constanttherapyhealth.com/constant-therapy/therapy-for-veterans.

We've been helping veterans for over seven years by working with VA clinicians across the country. In fact, **veterans receiving care at 27 VA hospitals across 15 VISNs are currently using Constant Therapy.**

Please contact me directly for additional information or if you need a reference from another VA Prosthetics department about how they procure Constant Therapy.

Thank you,

Melissa McCormack
